

DFS and BFS Spanning Trees

Special class

Spanning Tree

1 of the
possible

S. Trees

for the
graph in

previous slide

B.F.S. & B.F.S. Spanning Tree

~~1~~, ~~2~~, ~~4~~, ~~5~~, ~~3~~, ~~6~~ \leftarrow Queue.

A) $N \times M$

☒ B) $N + M$

C) $N^2 + M$

D) $N + M^2$

Bread Analogy

$$d[1] = 0$$

$$d[u] = d[\text{par}[u]] + 1$$

P.F.S. & D.F.S. Spanning Tree.

Time Comp of DFS ?

A) NM

~~B) $N + M$~~

C) $N^2 + M$

D) $N + M^2$

1.) given an undirected, unweighted graph and a src and a $dest$, find all the nodes which are part of at least 1 shortest path from src to $dest$. ($1 \leq N, M \leq 10^3$)

graph:

$src = 1$, $dest = 5$

ans: 2, 2, 1, 5

x is a part of answer if and only if

$$sd(src \rightarrow dest) = sd(src \rightarrow x) + sd(x \rightarrow dest)$$

\nearrow
 \nearrow
 $sd(dest \rightarrow x)$

$d_1 \leftarrow \text{bfs}(src)$

$d_2 \leftarrow \text{bfs}(dest)$

$$d_1[i] + d_2[i] \leq d_1[dest]$$

Find the Lexicographically
smallest path b/w src Δ
dest.

1 \rightarrow 5

1, 4, 5

1, 2, 3, 5

Example:

src = 1

dest = 5

ANS = 1, 2, 3, 4, 5

1 → 5
